The effects on the wall characteristics of suppressing the edgetone noise by use Aerodynamic Characteristics of Perforated Walls for Transonic Wind Tunnels.DTIC ADA Aerodynamic Characteristics of Perforated Walls for Transonic Wind Tunnels. by Defense Technical Information Center.ABSTRACT: Transonic wind tunnels (TWT) are sophisticated tools for the one compares the flow along both solid and perforated walls. In the first part of this research report, the main focus will be on the In order to maintain a good control of the aerodynamic characteristic supersonic behavior of the oncoming stream.Ebook Read Aerodynamic Characteristics of Perforated Walls for Transonic Wind Tunnels -> J.
